# Vermont High School Graduates
# Postsecondary Enrollment Rate

This report represents Vermont students who graduated with a regular high school diploma and enrolled in an institution of higher education within **16** months of their high school graduation date. This rate is **not** based on the 9th grade cohort. These percentages were derived using postsecondary data collected by the National Student Clearinghouse (NSC).

The National Student Clearinghouse collects enrollment data from ~93% of the postsecondary institutions that participate in Title IV Student Loans. While this captures the majority of postsecondary enrollments, it may not include many trade, vocational, military, and international institutions, or apprenticeship programs. Also, students and schools can opt for a "FERPA Blocker" on their enrollment records and therefore not be included in NSC reports.

It is also important to note that there may be a number of reasons for a secondary graduate not to continue to a postsecondary experience, or not to persist. While we work to eliminate inadequate preparation as a reason, we must also recognize that other factors may come into play. The rising cost of higher education and the potential debt burden is certainly also a significant factor in this important decision.
